

Kim Pfothenauer, DO, FACOFP, is a Board Certified Osteopathic Family Physician and a Fellowship trained Diabetologist. She is currently the Assistant Dean for Clerkship Education and an Assistant Professor at Michigan State University College of Osteopathic Medicine. She serves as National Faculty for the NBOME, on the board of the Michigan Association of Osteopathic Family Physicians, and on the American Diabetes Association Primary Care Advisory Group. She previously served on the American Diabetes Association Women's Interprofessional Network Advisory Group where she helped develop the WIN ADA Professional Development Course. She is also a founding board member and currently the Public Relations Chair of the American College of Diabetology. She has worked on educational initiatives with the American College of Osteopathic Family Medicine, the Endocrine Society, and the American Diabetes Association. Speaking regionally and nationally on diabetes, nonalcoholic fatty liver disease and vitamin D, she focuses on empowering primary care physicians to improve patient metabolic health.
