

Benjamin Visger is a board-certified specialist in neuromusculoskeletal medicine and osteopathic manipulative medicine. He earned his doctorate at MSUCOM in 2011 and completed his residency at Mercy Health Muskegon in 2014. He served as faculty in that residency program for two years before opening a private practice. This practice has now grown to six doctors with offices in Muskegon, Holland, and Grand Rapids, making it the largest OMM specialty private practice in Michigan! He continues to teach medical students and residents at his office as well as practicing physicians across the state at conferences. In 2025, he launched a series of medical documentaries called *The Dr. Visger Show*, fixing the way we fix pain by telling tough healing stories in living color!
