

Bio: Lance M. Owens, DO

Lance M. Owens, DO is a physician leader in clinical informatics and digital health transformation. He previously served as Regional Chief Medical Information Officer for University of Michigan Health Regional Network, where he led large-scale initiatives in artificial intelligence, ambient clinical documentation, and physician workflow optimization. Dr. Owens has been a national voice, speaking at several national conferences, in the responsible adoption of AI in healthcare and has been featured in publications including The Journal of Family Practice, The Journal of Applied Clinical Informatics, The Wall Street Journal and Mirror Review for his work in advancing AI-enabled clinical care.

He is particularly interested in how emerging technologies can reduce administrative burden and restore the human connection between physicians and patients. His goal is to 'Re-Humanize the Digital Transformation'. Dr. Owens is also involved in advancing education in dive and wilderness medicine and enjoys combining his clinical work with exploration and teaching.
