

Resolution 2023-A
Provision of on-site Childcare Services at MOA Annual Conventions

RESOLVED, that the Michigan Osteopathic Association convene a task force to investigate benefits of providing on-site childcare services at the Annual MOA Spring and Autumn Conventions and present their findings to the House of Delegates in 2024; and be it further

RESOLVED, that the Michigan Osteopathic Association investigate the potential financial impact of providing childcare services at the annual Spring and Autumn Conventions and present their findings at the House of Delegates in 2024.

The MOA received two proposals to provide childcare services. We chose KiddieCorp's Program because we thought it was most beneficial. The Program Fee is \$9,868 for four days. Ten children are the minimum. This quote is for 2024 rates and will increase for 2025.

The MOA is required to supply the following:

Space for the children's program – 50-75 sq. ft per child – 50 sq ft. is the minimum.

When we moved the conference from The Westin to the Somerset Inn in February 2023, we were not looking to accommodate daycare services. All four days, the only available space is a room of 980 sq ft., which means we could not have more than 19 children. The location of the Physician Wellness Center (OMM Tables and Yoga) is currently using this space so, we would have to move to a room in the attached office building to accommodate the Physician Wellness Center. The office building next door will not allow us to use the space for daycare due to liability reasons.

Additional MOA Costs:

1. Reimbursement of any handling fee for the Somerset Inn to receive and ship KiddieCorp supplies - \$75
2. One smart TV and 1 Flipchart with paper and pens - \$1,000 for four days
3. Snacks - \$200 for four days, based on ten children
4. Meal arrangements for children – \$800 for four days, based on 10 children (or parents can be responsible for meals)
5. One hotel guest room for four nights for the KiddieCorp manager - \$640

Total additional costs = \$2,715

KiddieCorp	\$9,868
Additional Costs	<u>\$2,715</u>
Total	\$12,583

The staff-to-child ratio is one staff member for 2 children from 6 months through 11 months old, which is included in the \$9,868 cost noted above. If there were more infants, the price would increase.

\$12,583 (/) a minimum of ten children is \$1,258 per child for four days at the conference. The guaranteed number of children, minimum of ten, must be confirmed four weeks prior to the event.

RESOLUTION 2023-B

SUBJECT: Reducing Burdens in the Utilization of Step Therapy

SUBMITTED TO: Michigan Osteopathic Association House of Delegates

SUBMITTED BY: Council of Interns and Residents

REFERRED TO: Professional Affairs Reference Committee

RECOMMENDATION: Approve as Amended

ACTION TAKEN AT MOA HOD: Approved as Amended

WHEREAS, Step therapy is a process by which medical insurers (private or public) provide coverage for more expensive medications, only after less expensive medications have been prescribed first, even if the lower cost medications may be less effective in the management of the medical condition; and

WHEREAS, By the time the patient has exhausted treatments as dictated by the step therapy, their medical condition could clinically worsen as well as suffering adverse symptoms as a consequence; and

WHEREAS, difficulty in obtaining exceptions by physicians to the step therapy dedicated regimen, may ultimately increase health care costs; and

WHEREAS, Insurance-mandated step therapy likely to impede access to newer, innovative therapies; and

WHEREAS, while utilization management like step therapy defines access for patients, it often does not keep pace with clinical guidelines*; and

WHEREAS, Michigan is one of the few states in the United States that does not have clarity around the exceptions process, and provides no timeline for submission and approval of exception requests to the step therapy mandated regimen; now, therefore be it

RESOLVED, that the MOA puts forth efforts to provide resources to its members regarding the current framework for the step therapy exemption process; and, be it further

RESOLVED that the Michigan Osteopathic Association advocates to state lawmakers and relevant stakeholders to improve the step therapy exception process in Michigan; and, be it further

RESOLVED, that the MOA advocates to the American Osteopathic Association to work with relevant stakeholders to ensure step therapy protocols are based on medical criteria and clinical guidelines developed by independent experts; and, be it further

RESOLVED, that the MOA advocates to the American Osteopathic Association to work with relevant stakeholders to streamline the exemption process for patients to move from step therapy.

LEAD AUTHORS: Anmol Pardal, OMS II; Syed Rizvi, OMS II

BACKGROUND INFORMATION:

Step therapy is used by numerous public and private insurers in the state of Michigan. While step therapy has been implemented with the goal of reducing health care costs, there are disease states in which step therapy may inadvertently increase health care costs. In particular, step therapy does not do well in the treatment of rare diseases and other medical conditions where new, more effective therapies are produced. For example, when an individual changes insurance plans, they may be required to go off a successful treatment and take a less effective medicine. For rare disease patients, the use of step therapy protocols is particularly concerning, as it can take years to find a diagnosis and a treatment that works. Hence, we are advocating for an exception process to be advocated for at a state level so that clinicians may prescribe treatments outside of the regimen mandated by the step therapy.

*Researchers at Tufts Medical Center recently found that step therapy was applied to 38.9% of drug coverage decisions, and more than half (55.6%) of those decisions required more steps than the clinical guidelines for diseases like multiple sclerosis, psoriasis, psoriatic arthritis, or chronic migraines.

RESOLUTION 2023-C

SUBJECT: Improving Discharge Outcomes for Patients Experiencing Homelessness

SUBMITTED TO: Michigan Osteopathic Association House of Delegates

SUBMITTED BY: Council of Interns and Residents

REFERRED TO: Public Affairs Reference Committee

RECOMMENDATION: Approve as Amended

ACTION TAKEN AT THE MOA HOD: Approved as Amended

WHEREAS, people with chronic conditions experiencing homelessness have higher rates of hospitalizations than people who are housed, and healthcare costs are 3.4 times higher for unsheltered versus sheltered individuals with inpatient medical costs that are 4.1 times higher for unsheltered individuals when compared to sheltered; and¹

WHEREAS, barriers to accessing care such as lack of insurance and transportation, as well as poor continuity of care result in frequent visits by those experiencing homelessness to the emergency department as their primary or only source of health care, and following discharge, these patients have a greater risk of returning to the emergency department with readmission, typically for the same or a similar diagnosis as their initial visit; and²

WHEREAS, each year, approximately 1,100 individuals living on the street, in tents, in cars, or in places not fit for human habitation are connected to shelter, housing, behavioral health supports, and other resources for their safety and well-being through Michigan's Projects for Assistance in Transition from Homelessness (PATH) program and other street outreach funding; and³

WHEREAS, medical respite programs in Michigan designated for those experiencing homelessness may be underutilized due to the lack of information to providers about such programs; now, therefore be it⁴

RESOLVED, that the MOA encourage educational opportunities for physicians on executing holistic, cost-effective and evidence-based discharge planning while being cognizant of the unique healthcare and social needs of individuals experiencing homelessness; and, be it further

RESOLVED, that the MOA advocate for and encourage collaborative efforts and communication between health systems, street medicine outreach programs, primary care providers, recuperative care centers, and other stakeholders; and, be it further

RESOLVED, that the MOA develop a task force that will evaluate the current state of transitions in care for the unhoused population in Michigan and report back with actionable items and/or educational opportunities for physicians at the MOA HOD in 2024.

RESOLUTION 2023-D

SUBJECT: Spartan Strong: Emphasizing AOA/AOIA Stance on Gun Reforms to Political Leaders

SUBMITTED TO: Michigan Osteopathic Association House of Delegates

SUBMITTED BY: Michigan Osteopathic Association Student Liaison Committee

REFERRED TO: Public Affairs Reference Committee

RECEOMMENDATON: Approve as Amended

ACTION TAKEN AT MOA HOD: Approved as Amended

WHEREAS, the National Rifle Association (NRA) continues to lobby for the use of semi-automatic-style rifles, such as the AR-15, with no corresponding gun safety laws¹ or common sense legislation; and

WHEREAS, on the night of February 13, 2023, Michigan State University was impacted by a mass shooting that had taken place on campus, causing three fatalities, leaving five in critical condition, and many traumatized; and

WHEREAS, the American Osteopathic Association (AOA) calls out for congress to label gun violence as a national public health issue, fund appropriate research on gun violence as part of future federal budgets, and establish constitutionally appropriate restrictions on the manufacturing and sale of large-capacity magazines and firearms with features designed to increase their rapid and extended killing capacity^{2,3}; and

WHEREAS, the American Osteopathic Information Association (AOIA) currently has formal relations with political figures through their Osteopathic Political Action Committee (OPAC), in which they continue to advocate for the Osteopathic profession⁴; now, therefore be it

RESOLVED, that the MOA regularly advocates through appropriate public advocacy groups regarding AOA and MOA policies on gun safety; and, be it further

RESOLVED, that the MOA formally recognizes gun violence as a Public Health Emergency and develops a task force to further explore the impacts of gun violence and the emotional, psychiatric, and antisocial behaviors of the perpetrators of gun violence on public health with a supporting white paper summarizing their findings to present at the MOA HOD in 2024.

FISCAL NOTE:

REFER TO:

The MOA Student Liaison Committee would like to dedicate this resolution to the three souls that were lost on February 13, 2023: Alexandria Verner, Arielle Anderson, and Brian Fraser. Most notably, we would like to dedicate this resolution as a means of contributing to the medical community on behalf of Arielle, an aspiring medical student.
